

MASTER'S THESIS PROJECT DISCUSSION

ALIREZA ZAREI

1. INTRODUCTON

We discussed the two components of our research project for the paper and the thesis. In terms of the first components, as we have conducted the study and gathered some promising results, we aim to finalize and add more optimizations items to the Dom Mutation Notifier. For the second component, we have two options in mind: 1) either tracking the states of ajax based web applications or 2) improving the WaitTime in Crawljax by means of DOM settlement.

2. DOM MUTATION NOTIFIER

In this part we aim to finalize the experiments and document the
